AN INCONVENIENT TRUTH

China

1 - What are the difficulties in China concerning :

Population ?

Economy ?

Energy ?

Coal ?

2 - What does the world hope for China ?

Scientists ?

Students ?

Population

1 - What can you say about the evolution of the population ?

2 - Why is it dangerous for the planet ?

Progress

The scientific and technological revolution

atomic bomb

The conventional war

We have to think differently
about war

Can you do a similar drawing to explain why we have to change our habits for the exploitation of the Earth ?

China

1 - The Chinese population increases so does the pollution because they have to use more energy so they need more coal, oil and gas...

(The Chinese population increases, they need to produce more and so need more coal, gas and oil consequently pollution levels increase too.)

2 - Chinese scientists are aware of the situation because of the growth of Chinese economy and the need for more and more energy.

Chinese students feel concerned.

Population

The world population has increased from 2 billion to 6.5 billion over a period of 25 years so the need for energy has increased proportionally.
