Correspondence in English with a Czech school

---

## PENFRIENDS IN THE CZECH REPUBLIC (5D)

This year, our class had a correspondence in English with Czech pupils thanks to our English teacher . Our penpals are between eleven and thirteen years old. It was a very good experience because we were able to practise our English for our English exam.

We wrote about our towns, our schools, the things we like. We exchanged our e-mail addresses. We are now friends with our correspondents . It was very good and funny.

We were happy to write the letters.

We would like to have correspondents next year !

Some of us met Czech young people . They were between seventeen and twenty-two years old. We didn't talk a lot about ourselves. I think it's because they were older than us . But we were able to exchange a little . It was funny too !

In 5D, a girl even accommodated a Czech student in her home during a week ; they spoke English and French. It was a good opportunity to practise !

This is our Czech friends ' timetable . they are at school from Monday morning to Friday evening , even on Wednesday afternoons.

They haven't got the same teacher in history and geography , and they haven't got the same teacher in chemistry and in physics .
