

Guy Chauvet Challenge

Article

There were four teams : Brainstorming team, Dream team, Ariel 6 team and No Name team. It was a difficult tournament.

First we started with the Spaghetti challenge, we had to build the highest tower with spaghetti , Marshmallow, string and tape. We used the marshmallow to create a solid base, around this marshmallow we used a lot of tape to reinforce them and stick it to the table, after we put some spaghetti in the middle of the Marshmallows. Then we hardened the spaghetti with tape and string because without this they would fall or collapse...

This is at the beginning...

...and at the end!

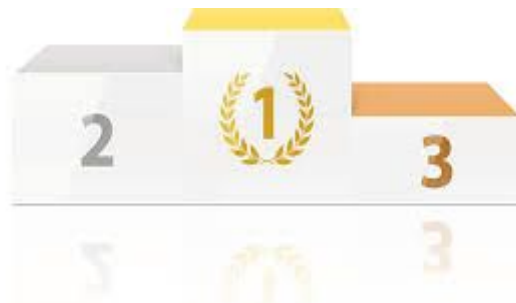

The second challenge was a sort of time's up game. One person was looking at the board while the others could not. The players had to guess what was shown on the board by listening and looking at their mate who could mime or define the object, action, celebrity.... We didn't really like this challenge because the pictures were the same, and the last group had the advantage of knowing them. Some of the pictures were very difficult. We got the second position, the first team was Dream team. The last team was No name team and the third group was Ariel 6 team.

The third challenge was with Boxes: we had to find what was in the box with our hands, we wouldn't see what was inside.. In the first box there was Rice,it was small and hard.In the second there was some strawberry jelly, it was really sticky and in the last one there was a plush rat, the fur was soft. 2 teams were level : our team and Dream team. We had to find what was in a fourth box to decide between us. In this box there was salt.

The final results are :

Ariel6

Dreamteam &Brainstorming
NameTeam

No
