An aerial photograph showing a large, circular, multi-layered structure, possibly a dam or a large-scale construction project, situated in a body of water. The structure consists of several concentric rings of earth and rock, creating a series of nested basins. The water inside the basins is a reddish-brown color, contrasting with the darker blue water of the surrounding lake. The structure is surrounded by a dense forest of green trees.

A top-down view of a circular, multi-layered structure, possibly a cross-section of a tree trunk or a stylized flower, lying on a bed of dry leaves and twigs. The structure features a central black hole, surrounded by concentric rings of red, orange, and yellow, suggesting a gradient of colors or a specific material composition. The surrounding ground is covered with dry, brown leaves and small twigs, creating a natural, textured background.
