

We need to act !

« *The Earth doesn't belong to us, we belong to the Earth* »

The rise of the oceans, the **global warming**, the **melting** ice, the endangered **species**... you know ? Our planet is in danger ! The principal cause is the excessive amount of **greenhouse** gas contained in the air. But there is a solution to this problem : reduce our carbon impact on the Earth.

For this, we can :

- use reusable bags,
- walk **instead of** using car when it's possible,
- in winter, wear a sweatshirt instead of using a radiator,
- sort our waste.**

It is very important to follow these **pieces of advice.**

Thank you very much !

The box :

- global warming : climate change
- melt : fondre
- species : animals, plants
- greenhouse : serre
- instead of : au lieu de
- sort our waste : trier nos déchets
- a piece of advice : un conseil
- belong : appartenir

Find words of the list in the board. Good luck !
