I personally really like this school. The reason for that is that everything seems very easy to me and every student is very open-minded and friendly, especially the teachers.

I really like it how we are always allowed to go to the bathroom if we need to and also like it that we have the choice to do something that we are truly interested in. For example, if you want to do something with food then you can choose to be in the gastronomy class but there are a lot more classes like the body care class and the building class. I also want to mention that we have a cafeteria with a lot of food to choose.
