Makhamtao Project

On December 15th we met Guy and Montri, two members of the association called "Les amis du vieux Tamarin". They talked about the goals of the association, the living conditions in a village called Makhamtao which is in Thailand, and also the educational system there.

We understood that their living conditions are very bad and it is very sad. That's why we decided to help a student by raising money to buy for example books, a computer....

Guy and Montri are going to visit Thailand and find a student we can help. We are very proud of this project.
